

Draft Asset Plan 2025–35

Fact Sheet

Council manages public assets with a total replacement value of over \$500 million, for the benefit of its community. As our Shire grows and changes, our existing infrastructure ages and requires change. To determine what we can afford, we must understand how growth and challenges like climate change impact long-term maintenance and renewal. The Asset Plan is a strategic document that covers the next ten-year period and outlines Council's approach to managing its community assets.

\$500 million

→ total public assets

What do we mean by 'assets'?

'Assets' refers to the portfolio of public assets that Council is responsible for managing:

- bridges and major culverts
- buildings and structures
- recreation and open space
- roads, paths and kerb
- water and drainage

How did we develop the Asset Plan?

- community engagement outcomes
- available asset data
- long-term financial planning
- strategic alignment with Council's goals and the community

Why is it important?

- ensures long term sustainability
- optimise resources
- supports informed decision-making
- enhances community wellbeing
